The Fund may accept or reject subscriptions at its discretion.

Distributions may be comprised of any combination of 1) net investment income and/or 2) net capital gain, and, if the Fund distributes an amount in excess of net investment income and net capital gains, a portion of such distribution will constitute a return of capital. A distribution comprised in whole or in part by a return of capital does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income." A return of capital distribution may reduce the amount of investable funds. The actual components of the Fund's distributions for U.S. tax reporting purposes can only be finally determined as of the end of each fiscal year of the Fund and are thereafter reported to shareholders on Form 1099-DIV. The Fund may pay distributions from sources other than earnings which may affect future distributions. The amount of distributions, if any, are uncertain and at the discretion of the Fund's board of trustees.
